## **- FIBERGLASS MARKER = NO DAMAGE -**

Due to hidden edges after snowfall, **we assume no responsibility for irrigation, sod, walls, gravel, bushes, etc... if Driveway Edges & Beds are unmarked.**

When marking edges, you must use a **flexible fiberglass driveway marker** that will not damage our equipment, and when snow is pushed against it, it will not snap off or bend over at the base.

Place markers 6 + inches in from the edge of the drive, approximately **60 -100' apart on straight sections & 40' apart on curves.** If there is a **Raised Cement or Asphalt lip** that we will catch our blades on, and damage your property or ours, **double mark it** at 12 inches apart on both sides.

**Flexible 48" solid markers purchased at our Center - Only \$ 1.89**

Wooden, Steel or aluminum markers **SHOULD NOT** be used. They will either bend under heavy snow or break at the base.

By marking your drive, you will protect your property and ours.

**NOTE:** Markers need to be installed prior to the ground freezing  
**Call to have your markers installed when we perform your Cleanup & Winter Wrapping.**  
**This is a free service when we are already on your property**

**We are Happy to provide you with Superior 24 / 7 Service this winter**
